

ALLEGHENY PAPER SHREDDERS CORPORATION

The unchallenged world leader in high capacity destruction systems

Total Shredding Solutions

Powered by
Allegheny

**Paper Shredders • Security Grinders
Pierce & Shear Shredders
Product Destruction Shredders
Mobile • Plant-based**

JOHN W. WAGNER
*President and Founder
of Allegheny*

“As the unchallenged world leader in document and product destruction systems, Allegheny is the only company to manufacture all types of destruction equipment—

High Capacity Paper Shredders, Security Grinders, Pierce & Shear Shredders, and Product Destruction Shredders. Allegheny is your one source for all destruction technologies. We offer an unmatched range and combination of systems to provide the total solution for your security needs. No other company can offer the expertise and equipment to get the job done.

“As industry professionals have come to expect over the last 35 years, our equipment is built ‘The Allegheny Way’—with the highest standard of quality. The proven reliability of our equipment assures that your destruction operation will keep running smoothly for many years to come.”

“Allegheny builds lasting relationships with our customers by designing and manufacturing the most superior equipment in the industry, and by providing the most outstanding service and support available. When comparing cost, throughput, and shred size, the Allegheny advantage is obvious.”

Allegheny — The Solution!

Thousands of successful contract shredding services worldwide rely on Allegheny equipment for the secure destruction of their customers' confidential material.

When your company needs a powerful, high capacity destruction system for either mobile or plant-based operations, Allegheny equipment will meet your needs — and your budget.

Built to Last

Allegheny designs, engineers and manufactures its equipment to withstand the most demanding applications. The result? A truly enviable record of reliability: 94% of all Allegheny equipment bought 25 years ago is still on the job today!

- **100% American made, offered to you at factory prices**
- **Absolute dedication to customer service**
- **Built by skilled craftsmen utilizing state-of-the-art computer-aided design and manufacturing (CAD/CAM)**
- **Maximum performance with highest capacity, from 500 lbs/hr. to 25 tons/hr.**
- **Designed for ease of maintenance and servicing to avoid costly downtime**
- **Backed by the Strongest Warranty in the Industry and a 10-Year Guaranteed Trade-in Policy**

As the industry leader, Allegheny offers more than just equipment. We offer solutions!

- **Professional evaluation and equipment consulting**
- **Custom-designed complete systems to maximize productivity and reduce labor costs**
- **Free comprehensive on-site assessment for high volume applications**

Allegheny will help you develop the most efficient means to collect your confidential material, process them through your destruction system, and recycle for a profit!

PAPER SHREDDERS

High capacity shredding systems
up to 25 tons/hr.

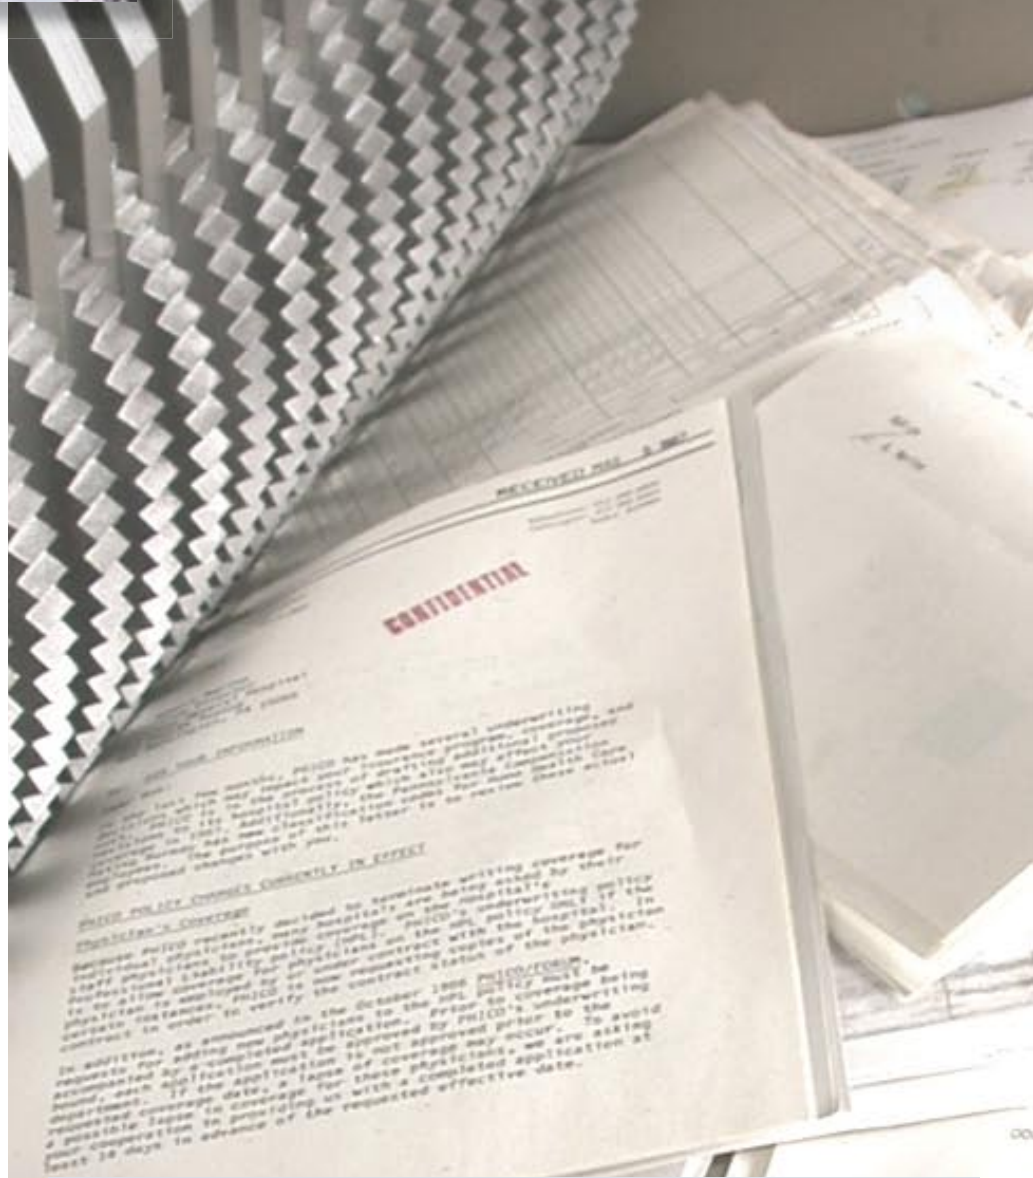

Allegheny paper shredders provide the optimal combination of security, economy, durability and high capacity. Ranging from powerful conveyer-fed models to high volume shredding systems, Allegheny paper shredders are the chosen method of destruction by tens of thousands of organizations and contract shredding services worldwide.

- High capacity shredders and shredding systems from 500 lbs/hr. up to 25 tons/hr.
- Significantly higher volume of output per dollar invested than any other brand
- Wide range of capacities and horsepowers to meet your needs and your budget

For even greater security in high volume applications, Allegheny Cross-Shredding™ technology results in a smaller shred size than conventional strip-cut shredding. If you currently have a shredder, we can work with you to integrate Cross-Shredding technology into your existing system. This solution is not only cost-effective, but also will significantly increase your overall throughput!

“I visited the Allegheny factory before I purchased my equipment. Everyone there made me feel like I was part of the Allegheny family. When I spoke with other owners of contract shredding services, they told me that when they bought again, it would be from Allegheny — and that with Allegheny I wouldn’t go wrong.”

— Renee Keener, President and Owner
American Document Securities

Model	Capacity	Horsepower	Feed Opening	Shred Width
16-75C	500 - 800 lbs./hr.	3 or 5	16"	5/16"
16-150C	900 - 1,200 lbs./hr.	7 1/2 or 10	16"	1/2"
18-250C	3/4 - 1 ton/hr.	15 or 20	18"	1/2"
20-350C	1 - 2 1/2 tons/hr.	25, 30, or 40	20"	1/2"
30-500C	3 - 5 tons/hr.	50, 60, 75, or 100	30"	5/8"
36-1000C	5 - 7 tons/hr.	75, 100, or 125	36"	5/8"
36-1000C HD	8 - 11 tons/hr.	125, 150, or 200	36"	5/8"
48-2000C	12 - 15 tons/hr.	250 or 300	48"	5/8"

Cross-Shredding Systems with capacities up to 25 tons/hr.

SECURITY GRINDERS

Single-stage document and product destruction up to 10 tons/hr.

When the highest level of document security is required, Allegheny Security Grinders are the solution. These high-performance grinders are designed for single-stage, ram-fed 'dump and run' destruction.

- 100% American made — no import-export or overseas shipping costs, saving you thousands of dollars
- Superior technology exceeding all other brands — more tonnage of destroyed material for every dollar spent
- Large in-feed hopper with computerized ram to accommodate 'dump and run' operation, up to 10 tons/hr.
- Anti-bridge Rotary Feed™ to optimize throughput
- Proprietary single-shaft rotary design with consistent screened shred size from 3/4" to 3"
- Innovative technology enables secure document, plastic, and product destruction

"Allegheny equipment affords us maximum efficiency, tremendous throughput, and the most secure shred size possible. Also, Allegheny has been phenomenal in its customer service. I commend them on the way they service and stand behind their equipment."

— Mark R. Miller,
General Manager,
Andrews Destruction
Services, Inc.

Model	Capacity	Horsepower	Feed Opening	Rotor (diameter)
1436GXM	1 - 1 1/2 tons/hr.	Hydraulic	36"	14"
1436GX	1 1/2 - 2 tons/hr.	50	36"	14"
1452GX	2 - 3 tons/hr.	100	52"	14"
1462GX	3 - 4 tons/hr.	125	62"	14"
2078GX	6 - 7 tons/hr.	200	78"	20"
2598GX	7 1/2 - 10 tons/hr.	250	98"	25"

COMPLETE DESTRUCTION SYSTEMS

To maximize productivity, reduce labor costs, and increase recycling profits, Allegheny also offers:

- Sorting, In-floor, and Metering Conveyors
- Security Cabinets
- Tipplers
- Auto-Feed Systems
- Horizontal Balers

PIERCE & SHEAR SHREDDERS

Rugged, reliable 'dump and run' destruction up to 10 tons/hr.

Allegheny Pierce & Shear Shredders provide a cost-effective method for automated shredding in a small equipment footprint. The large capacity hopper is designed for 'dump-and-run' operation to allow secure destruction of high volumes of confidential material.

High performance Allegheny Pierce & Shear Shredders produce smaller shred size than any other brand.

- 'Dump and run' operation — up to 10 tons/hr.
- Can be used as a stand-alone unit, or in conjunction with a strip-cut shredder to create a cost-effective, high performance Cross-Shredding system
- Superior performance readily accommodates both document and product destruction

"Allegheny has its own internal standard of excellence, both for its equipment and its customer service, and maintains that standard even when customers would be satisfied with less."

— Ron Mason, President,
Rohn Industries

Allegheny can custom-design a complete destruction system to maximize your productivity, reduce labor costs, and enable you to turn your destroyed material into recycling dollars.

We'll help you determine the most

efficient ways to collect material for destruction, process material through your system, and recycle destroyed material for a profit.

We'll even help you design the physical layout of your system to make the most efficient use of avail-

able space and personnel. Using computer-aided design technology, we can provide a detailed diagram showing the most efficient layout of your system within your facility.

Once you purchase Allegheny equipment, we are available to install

it and train your personnel in its proper maintenance and safe, efficient operation.

We invite you to visit our facility in Delmont, Pennsylvania, and see for yourself our commitment to quality.

Model	Capacity	Horsepower	Feed Opening	Shred Width
30SR	1 - 2 tons/hr.	30 to 40	30"	5/8"
50SR	3 - 6 tons/hr.	60 to 75	42"	5/8"
60SR	7-10 tons/hr.	100 to 120	60"	1"

PRODUCT DESTRUCTION

High volume product destruction in a single pass — up to 12 tons/hr.

Problem: Today, thousands of companies worldwide are losing revenue and risking product liability due to the piracy, resale, or reuse of returned, defective, or obsolete merchandise.

Solution: To address this growing problem, Allegheny has developed an innovative line of Product Destruction Shredders — the result of over 35 years of engineering and manufacturing excellence.

These virtually indestructible, high-capacity machines enable you to enter one of the fastest growing sectors of the confidential destruction industry by offering all types of product destruction services to customers.

- Assure total destruction of product identity and usability by crushing and shredding into non-identifiable pieces
- Solve your customers' security problems by destroying high volumes of products such as CD's, computer hardware, electrical equipment, telephones — and even products such as metal furniture and filing cabinets
- Secure, effortless, high-volume destruction in a single pass

“Our Allegheny Product Destruction Shredder will run as much as we put through it — over 10 tons per hour, up to 15 hours per day, six days a week. And it's very low maintenance. We will never buy another piece of equipment except from Allegheny.”

— Nick Wildrick, President,
Shred First, LLC

Model	Capacity	Horsepower	Feed Opening	Shred Width
163DX	750-1500 lbs/hr.	3	16"	1"
3025DX	1-2 tons/hr.	20 and 25	30"	1"
3650DX	4-8 tons/hr.	30 and 50	36"	1 1/2"
52125DX	8-12 tons/hr.	100 and 125	52"	2"

The Ultimate Mobile Shredding System

"Buy Allegheny equipment. We mean that from the heart. Allegheny is there to help you, both before and after your purchase. There's very little maintenance on their machines, and they have a wealth of information about the industry that they're willing to share."

Tim and Paula Oberst
Ohio Mobile Shredding

State-of-the-Art Destruction On-Site

Allegheny has revolutionized mobile shredding. This high-performance, turn-key system automatically dumps, shreds, compacts, and unloads — saving you an incredible amount of time and energy!

These powerful mobile systems provide everything you need for state-of-the-art, on-site document and product destruction.

- Capacity from 1 to 1 1/2 tons/hr.
- Consistent screened output guarantees total destruction in a single pass
- Curb-loading Tipper accommodates 64 gal. to 96 gal. containers
- Powered Feed Enclosure assures full containment of material
- Full truckload empties in 3-4 minutes with no dumping required

Components of Allegheny Mobile Shredding System:

Allegheny Security Grinder: Model 1436GXM

Capacity: 1 - 1 1/2 tons/hr.

Screen Size: 2" (other screen sizes from 3/4" to 3" available)

Rotor Size: 14"

Hydraulically Driven Motor

Construction: FRP (Fiberglass Reinforced Plywood) Smooth Wall Construction

Tipper: Curb Loading Tipper — accommodates 64 gal. to 96 gal. containers

Powered Feed Enclosure: assures full containment of material

Discharge: Keith Walking Floor (no dumping required) — only 3-4 minutes to empty a full truckload.

Controls: Panel Mate ePro Industrial PC / Touch Screen / Curb Level

Box Size: 24 Ft. (Approx. 17' Payload Area)

Payload: 6,000 to 8,000 lbs.

Chassis: International Model 4300

GVW: 33,000 lbs.

Engine: International DT466 (250 Hp)

Transmission: Standard Shift (Standard)
Allison Automatic (Optional)

Complete Destruction Systems

Reduce labor costs and generate maximum profits

To maximize your productivity and reduce your labor costs in high volume applications, Allegheny also offers: Conveyors, Tippers, Auto-Feed Systems, and Balers.

Allegheny can custom-design a complete system to meet your needs. We'll also help you design the physical layout of your system to make the most efficient use of available space and personnel. Using computer-aided design technology we can provide you with a detailed diagram showing the most efficient layout of your system within your facility.

Once you purchase Allegheny equipment, we are available to install it and train your personnel in its proper maintenance and safe, efficient operation.

CONVEYORS

To assist in moving material to and from your destruction equipment, Allegheny offers optional conveyors:

Sorting Conveyors allow your operators to separate material by grade and type prior to destruction,

thus maximizing the value of your recycled material.

In-Floor Conveyors allow operators or a front-end loader to push material into your destruction equipment without lifting.

Metering Conveyors automatically control the amount of material moving to the cutting/crushing assembly. This helps minimize jams and optimize throughput.

Output Conveyors (bolt-on or roll-away) allow easy transporting of destroyed material into a baler, compactor, dumpster, or other receptacle.

Mobile Pit Conveyors allow mobile truck pre-destroyed material to be conveyed to your baler.

TIPPERS

Used with a loading cart, security cabinet, or a Gaylord container, a tipper offers an efficient way to load material onto your input conveyor. This increases throughput of material to be destroyed and minimizes operator fatigue and strain.

AUTO-FEED SYSTEMS

The Allegheny "Auto-Feed" System sets a new standard for the destruction industry. This revolutionary system automatically feeds all types and grades of material and allows 1 operator to do the work of 2 or 3, saving you expensive labor costs.

HORIZONTAL BALERS

Allegheny offers a complete line of horizontal closed-end balers and auto-tie open-end balers to increase the efficiency of your disposal or recycling operations. Allegheny balers produce dense, superior quality bales that increase your recycling profits. Bale

weights range from 175 lbs. up to 1,500 lbs.

Whether you're considering a mobile or plant-based operation — or both — Allegheny manufactures cost-effective, reliable equipment you can build your business around.
